## PROFESSIONAL EXPERIENCE

### Immigration, Refugees and Citizenship Canada

Ottawa, Canada

Data Scientist, *Advanced Analytics Solution Centre*

Oct 2022 – Present

- Revamped legacy classification models with modern software to improve scalability, performance, and knowledge sharing, while reducing reliance on licensed software
- Developed data pipelines for additional KPIs, ensuring monitoring of model performance and data quality issues.

Data Analyst, *Anti Racism Task Force*

Dec 2020 – Oct 2022

- Analyzed HR data and conducted a department-wide survey informing the IRCC's hiring and AR strategy.
- Designed the methodology and prepared quarterly reports for Minister's Office, showcasing AR activities performance.
- Created and supported delivery of informative presentations at EX forums, gaining executive support for Anti-Racism initiatives and identifying areas for improvement.

Project Officer, *Employee Experience Team*

Oct 2020 – Dec 2020

- Streamlined the process of connecting students to recruiters by designing a database, user interface for querying data, and a form allowing students to populate the database leading to reduced workload of hiring managers.

### McGill University

Montreal, Canada

Research Assistant, *Desautels School of Business*

March 2023 – Present

- Created a [website](#) to summarize glyphosate research, raise awareness, and provide a reference for various speeches
- Collaborated with a team of students to plan and prepare three community projects for a larger team, streamlining the project initiation process and ensuring successful execution.
- Created a [website](#) featuring a robust backend architecture and engaging front-end interface, facilitating the reporting of animal accidents while promoting sustainability.

### Ottawa Hospital Research Institute

Ottawa, Canada

Research Assistant

Feb 2020 – Aug 2020

- Analyzed patient-level and scheduling datasets to effectively utilize them for optimization and simulation models.
- Applied operations research techniques to enhance patient scheduling, block scheduling, and capacity planning.
- Created web applications to showcase decision support tools, to gather support for project transition to production.

### University of Ottawa

Ottawa, Canada

Research Assistant, *Telfer School of Management*

May 2019 – Present

- Developed a Markov Decision Process model for surgery scheduling, reducing wait times for high-priority patients.
- Conducted simulation experiments to evaluate hypotheses and support a master's student thesis.
- Conducted research on non-linear approximation for approximate dynamic programming.

## EDUCATION

**McGill University**, Desautels Faculty of Management

Montreal, Canada
